Project Brief:

WordPress Website of IT Services (PCB Design) Based Client, with Logo, Intro Video, & Social Media Account making & maintenance, Client Business Name **"Chips & Traces"** & Hosting & Domain name will be finalized later.

Overview

WordPress Website "Chips & Traces". The website consists of some basic web pages (i.e., Home, About Us Contact & Other Relative pages), Along with some Special pages & post types (i.e., Services, *Portfolios, *Clients & Blogs), each Post type consists of One-a page Archive of all Relative Items & when you click on any item it will redirect you to its page.

In Deliverables, the client will get a fully functioned & optimized, High-quality WordPress website with full administration so that He/ She can also make changes on their own, along with High-quality LOGO (PSD, PNG, AI & SVG Files), a Simple yet high-Quality Introduction Video for His/ Her Social Media Accounts.

* Note These are for Future use (it not be created at this Step nor Quoted in Pricing in this step)

About Us

eSpark Consulting Group is a privately held company, consisting of a creative & multi-talented team comprised of Web designers, Web developers, & graphic designers. We provide a wide range of services including Web design, Web development, mobile application development, Web hosting, & consulting. eSpark Consulting Group offers customer-oriented services & delivers creative & effective results.

Scope of Work

For the initial phase of development (the online presence), eSpark Consulting Group will work with the client to create a WordPress Website.

The Development phase will remain for 6-8 weeks. In which we will Develop All Pages along with special pages for services and blog included with proper flow & navigation upon all Clients Requirements. Ensuring Smooth User Experience for all Pages & Posts. Considering all Aspects covered which the Client have listed in their Project requirements.

Milestones:

At This Step, Your Site consists of 6-7 steps, Pricing and Working hours (Duration) is mentioned below, Pricing is not final and can be negotiable and may vary according to further requirements:

Milestone One (1): Data Gathering & Theme Finalizing

- In the First Step, we will get all essential information from the client, regarding themes suggestions, Logo related suggestions and we will also ask the client if He/ She had fetched or have any ideas or suggestions in their minds.
- Next, we will pitch 4-5 logos to the client and we will final one from them, we will also confirm exact color codes from the client for Heading's text and Buttons, etc.

Milestone Two (2): UI/UX Development (Basic Pages Creation)

- In this step, we will work on client selected theme and create basic pages and make a link of the site public to the client, so that we can look into it and can see progress.
- Then duly approved it by the client so that there will be no further requirements with the design.

Milestone Three (3): Special Pages Creation and Content writing

- In this step, we will insert all the content for Blogs and Services pages, and work on rewriting of text that had been provided by the client.
- Then the client will review and let us know about further changes if any.

Milestone Four (4): Data Insertion and Interlinking of Site

- In this step, we will insert all the content in their respective pages, and work on rewriting of text that had been provided by the client.
- After that client will review and let us know about further changes if any.
- After completing the above task, we will interlink all pages and CTAs, making sure that there will be no 404 issues.

Milestone Five (5): Troubleshooting, Speed optimization, and Basic SEO

- In this Step, we will thoroughly check every page of the site, on Desktop and Mobile, find and remove all design and flow bugs that exist and make sure that each text, media, and design will sync with each other and work properly.
- Then, we will go for Speed Optimization for Desktop and Mobile, so that site will Load and run smoothly,
- After making sure all the above issues are resolved, then we will go for SEO of the Website for max 4-5 keywords, and on these keywords, we will make sure that the site will rank above average.

Milestone Six (6): Social Media Creation and Handlings (On-Going Task)

- In this Step, we will take the client in the loop and Make Professional Social Media Account for
  LinkedIn, and Twitter,
- The first few posts will be created by us, on the same day than other posts will be created on-demand.
- For all Posts Content will be provided or suggested by the client, frequency of posts will be decided by the client too.
  (minimum 1 post/Month & Max 1 post/week)

Milestone Seven (7): Maintenance and Further Lookups (On-Going Task)

- In this Step, we will work on further improvement and enhancement of the site and introducing extra features to the site.
- We will also work on website security, weekly Backup of the website, and restoration if any cyber-attack happened.
